

Vascular Services

Pharmaron can take your program from feasibility through 510k/PMA submission with our comprehensive portfolio of preclinical vascular services. Pharmaron offers valuable resources such as in-house IACUC, it is AAALAC accredited and OLAW assured. It is also compliant with the GLP principles and offers in-house veterinarian consultants specialised for specific vascular areas.

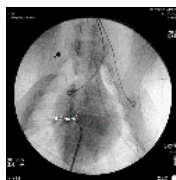

The species used for research purposes are rodent, rabbit, canine, minipig, pig and sheep.

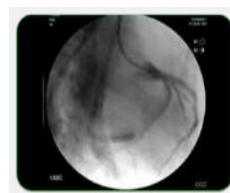

Rabbit Aneurysm Model

Thrombectomy Model

Porcine Ablation Model

Porcine Myocardial Infarction Model

Test Devices

- Ablation/Electrophysiology
- Transcatheter/transapical Valves
- Embolics/coils/diverters/occluders
- Sheaths, catheters, wires, stents
- Thrombectomy systems
- Vessel Fusion
- Cell and Gene Therapies

Diagnostics

- Fluoroscopy
- Ultrasound
- Blood Gas Measurement
- Clinical Pathology
- Histopathology

Vascular Procedures

- Angioplasty
- Stent Placement
- Deep Vein Thrombosis
- Localized Drug Delivery
- Thrombectomy
- TAVR/TAVI
- Peripheral Delivery of Devices
- Lithotripsy
- Induced Myocardial Infarctions
- Cardiothoracic Surgery
- Aneurysm Creation
